## BEAUMONT IS AFTER PORT ARTHUR CANAL

Deep Waterway Projectors Feel Assured of Success by This Route.

OWNERS NOT ENTHUSIASTIC.

Committee of Texas Citizens Will Journey to Kansas City to Consult Southern Railroad Officials.

REPUBLIC SPECIAL.

Beaumont, Tex., Aug. 15,-Within the next few days, a committee of influential men will leave for Kansas City to interview President Knott | Wednesday with a young man, whose iden-Kansas City to interview President Rhott of the Kansas City Southern Railroad, owner of the Port Arthur ship channel, in an effort to smooth the way toward the acquisition of the canal by the United States Government, and its use in connection with the plans for a deep water channel from Beaumont and Orange to the gulf.

It is the present hope of the friends of the deep water scheme to acquire this canal, which is cut along the west side.

Wednesday with a young man, whose identity is not known. The descriptions of the tity is not known. The description of the girl and young man with whom she went it is not known. The description of the police. Miss way have been given to the police of find and detain her. She way have been given to the police of find and detain her. She way have been given to the police. Miss way have been given to the police of find and detain her. She have a safety the police of find and detain her. She have a

canal, which is cut along the west side of the Sabine Lake from a point a few miles below Port Arthur to the mouth of Taylor's Bayou, at the southern end of Port Arthur, and in this way greatly lessen the labor of building the main canal. expected to bring the canal, is only about eight miles, and is considered the best route. Only a narrow neck of land separates the Sabine from the Neches at this point, and but little digging would have to be done to establish a 24-foot channel in this way from Sabine Pass to Orange and Beaumont.

But the owners of the Port Arthur canal do not appear to be enthusiastically in favor of turning their property over to the Government at the rate of remuneration suggested, and there has occurred a hitch in the arrangements.

There is said to be no question of the praoticability of bringing deep water ships up either the Neches or the Sabine River. In each river, from a change of the practicability of bringing deep water ships up either the Neches or the Sabine River. From Taylor's Bayou to the point near the

practicability of bringing deep water ships up either the Neches or the Sabine River. In each river, from a short distance above it empties into Sabine Lake, there is a Some other day;
And harbors we hope to drift into,
Some other day;
With folded hands, the oars that trail,
We watch and wait for a favoring gale
To fill the folds of an idle sall,
Some other day;
We know we must toil if ever we win,
Some other day;
But we say to ourselves, there's time to
begin clear channel between almost perpendicu-lar banks to points considerably above Orange or Beaumont. The rivers wide, although crooked, and seafaring men claim that there is ample room for the passage and the turning of the largest

ships now engaged in the guif trade, Sabine Pass, too, is sufficiently deep and wide for large vessels. But Sabine Lake, into which the two rivers and the Pass open, is little more than a marsh. Bathers can wade almost across it, and even the channels which have been dug by the the Until at last we find withdrawn the The strength of the hope we leaned upon, Government, and which are kept open only by the greatest care, are barely more than six or seven feet deep. Small boats have great difficulty in threading their way among the bars that intersect the lake for its entire extent.

The present ship canal to Port Arthur was built by a company which was owned prin-cipally by the Kansas City Southern Rali-Contract Surgeon Harry James is relieved from duty at Camp Toomas, Ga., and will proceed to his home for annulment of contract.

William D. Pritchard is discoursed as First Lieutenant, Porto Rico provisional regiment of infantry, by reason of his acceptance of an appointment as Second Lieutenant of infantry in the regular army.

Captain Henry Snyder, assistant surgeon, is relieved from duty as attending surgeon and examilier of recruits in New York City, to take effect upon the expiration of present leave, and will then proceed to Platisburg Barracks for duty at that post.

The order recently issued regarding Lieutenant Colonel James Kerr, Assistant Adjutant General is changed so as to direct him to proceed to Port Leavesworth for duty as Adjutant General of the general service and staff college.

Major Charles Crane, United States Infantry, Assistant Adjutant General is relieved from duty in the Philipphies and ordered to San Francisco for assignment to duty as assistant to the Adjutant General of the popuration of California.

Laeutenant Colonel William Ennis, Artillery road to enable it to load directly from the cars into ships. It runs along the southwest edge of the lake a distance of about six miles to the mouth of Taylor's Bayou, a deep but sluggish inlet. This canal was one of the many schemes of the versatile Arthur Stilwell, builder of the Kansas City Southern, founder of the town of Port Arthur, and projector of many other enter-prises, which, regarded as chimerical at the time of their foistering, have since proved

TAILOR-FINISHED GOWNS IN ART LINES.

ward discloses that pleats have worked downward. The pleats may be on the box order and go around the whole skirt, or ness as regards the ear and its functions. order and go around the whole skirt, or may be side pleats and appear on the sides only. If the skirt is plain, with a flounce, the latter usually is pleated. In some ex-amples the pleats are carried up into the of large size find no difficulty in landing at the wharves at the southern end of Port Arthur and since the discovery of oll at Spindletop the traffic has been enormous. upper portion of the gown is likely to be a marked characteristic of fall. In some models the coat is of the loose sack order, such as was seen early in the summer, and again it is of the well-fitted-in style. Pleats The last Congress appropriated \$125,000 for the first of this work, the plan being to open an eight-foot canal with this money; are like stripes, they add to the wearer's apparent height. It seems impossible to overdo these tricks, for tall every woman should be to show current styles to advan-tage. Even small accessories of dress are found to further this plan. Flat ruffles with long ends that dangle down the front. son—to deepen the canal to twenty-four feet is being exploited with apparent success. It is proposed to pay the Port Arthur canal people for their canal, a sum equal to that which would be required for its recenstrucpelerine collars, capes that give sloping shoulder effect—all these suggest willows figures—"serpentine" figures, as they now which would be required for its reconstruc-tion. This would be considerably less than that required for the building of a canal by a different route, but up to the present time the canal people have held out for a greater remuneration. For this reason, it has been deemed advisable to have a com-mittee interview President Knott and at-ternot to persuade him that the extension are called.

Although last spring brought so many new tallor gowns that it seemed as if styles must soon drift away from them, still the fall disclosures hint of tailoring galore, and all of it ranking as high fashionably as it did five months ago. Jacket and skirt suits

They Are in Grent Demand and Are Shown in Attractive Forms. did five months ago. Jacket and skirt suits retain their favor, but will differ from the spring output in that most of them will show little trimming aside from tucking and pleating. Nearly all jackets come below the waist line, or have postilion or basque finish. Boleros are a triffe shorter in front than formerly, and many have the basque effect. Skirts are finished with straps of silk or cloth, bands of passementeria, in colors, black, white and Eastern blends. Lace is little seen, and then only the very deep ecru tints of heavy quality. Applications of lace and heavy embroidery are used a little. Wool embroidery in various colors is being employed, and is a very satisfactory trimming.

Shown in Attractive Forms.

Bars, both those worn by chatelaine and those carried in the hand, are in great demand and show many attractive forms. Quite the smartest are in beadwork. The worked on canvas in dear quaint floral designs. The patterns, or similar ones, can be found in any work given over to German cross stitch, and the work is not more exacting than that bestowed on many less worthy objects. Those made with fitted tops mean inevitable cost.

EXERCISE OF WALKING. of the canal along the plans outlined would be advantageous for his road and his canal, South Eleventh street, is being searched

are used a little. Wool embrodery in the our colors is being employed, and is a very satisfactory trimming.

Thin soft cloths will be worn until well into winter. New broadcloths and cheviots are lighter in weight than usual, and cashmeres and benriettas are being revived. They are much softer and lighter and make up nicely. Velvet will be used for trimming, and later will appear in gowns. Brown in a rich goiden hue promises to be favored during fall and winter. Lighter shades than usual are found in fall goods, and long-haired materials will count as extremely stylish. Mauve, with a pale tint of pink, blue or green, is much favored. Buttons and cord ornaments will be plentiful. Fancy fronts will be stylish for boiero coats. Sieeves are larger, puff a deal at the wrist and have fancy cuffs. The bishop sleeve will still be a standard shape.

WRAPS OF BLACK TAFFETA.

Require Quantities of Silk, as They Are Much Frilled.

Small wraps of black taffeta are attracting much attention owing to their extreme smartness and novelty. They are very claborate as to make, requiring quantities of silk, as they are much frilled and shirred. Needless to say, they are among the costly accessories.

Blue is as popular as ever for morning wear, and there is generally a note of blue in my lady's afternoon and evening gowns or hats.

Cretonne covered boxes for gloves, handkerchiefs, ribbons, veils and other small articles are a very convenient purchase for those who expect to move about much during the summer; they keep the above-named articles fresh and are easy to find.

Pale-rose color and maize are among the prettiest and most popular shades for dress material. Are Much Frilled.

prettiest and most popular shade

material.

Pretty little collars of the tucnover variety are made of white taffeta silk, beautifully embroidered in pink or blue.

Soft shaded Roman stripes are appearing in some of the wider white ribbons.

Curtain screens shut off the rays of the sun and yet leave much of its light. Those that are painted green are the most satisfactor?

TO GUARD AGAINST DEAFNESS. jurious to Ears.

Deciness is a great affliction, but many persons are very careless in guarding against it. Wet hair and cold plunge baths are bud for any one with a tendency to deafness. The extremities must be kept warm and draughts avoided by such perions.

No cold liquid should touch the inner sar. No oils should be poured into the ear with the idea of relieving an ache. It ear. No oils should be poured into the ear with the idea of relieving an ache. It only increases inflammation. Some people have a perfect dread of get-

DAINTY FROCK.

mon house fly fills them with terror if it buzzes too near them. In reality there is little danser in the matter. The secretions of the ear are bitter, and will force an insect to leave. Hot water poured in will kill it and bring it to the surface.

Beaing a child's ears is barbarous and

Review of the fall styles already put for- , likely to permanently affect its hearing.

AUTOMOBILE HEADGEAR. 'Meteor" Similar to German Yachting

Cap, but Is Smaller. Women seem to consider that almost any hat, if it be small and will stay on the head comfortably, is suitable for the automobile. But the few costumes that have appeared for this particular pastime indicate that the machine, like the horse, must have a habit all its own. A cap that has found favor with chauffeurs is known as "the Meteor," and is nothing more nor less than the German vachting cap made a trifle smaller. They come in red, black and tan leather, the flap over the face extending nearly all the way round.

Such a hat is rather heavy, but a soft padding is placed immediately under the brim to resist the pressure on forchead. No yell is necessary with this beadwear, unless one dislikes stray locks flying about but the cap fits so tightly around the head and the flap protects the eyes so well from the light and dust, that it meems to be all-sufficient.

POPULARITY OF BAGS.

How the Complexion May Be Improved and Weight Reduced. The woman who is in the habit of taking the street cars for every three blocks she wishes to travel is the one who has a bad complexion and complains of growing stout. If you are among that number say bothing, but get to work and walk. Take a walk every day give up the street car habit. walk every day, give up the street car habi

With the bow one can perform many physical culture exercises. A good one for the strengthening of the back is that of bending the bow. Take the instrument in the left hand, and with all your might bend down upon it so that the bow is bent. The arrow is not needed in this sort of exercise. If it were not for the losing of the arrows one could practice with the bow upon the house-top. With a very large target and a guard in the shape of a wide, tall fence at each side of the target, one can get a great deal of physical culture in the roof garden. Do not rest in your pursuit of strength and remember as muscle comes, good looks come with it. Fat disappears and the glow of beauty comes into the complexion.

A walking trip is in many respects the best way to spend a vacation—best for both mind and hody. A club, including a dozen, more or less, of both sexes, the young women having fathers or brothers or even mothers in the party, should plan the trip carefully and arrange details before the start is made.

SHORT TAFFETA SACQUE. Sleeves Are Bell-Shaped and Com-

Sleeves Are Bell-Shaped and Completely Cover the Hands.

The originator of the short taffeta sacque that hangs in pleats from the shoulders would certainly have been sufficiently punished for introducing such a very hideous style in fashiondom if he or she had caught a glimpse of a specimen of this particular cut seen in St. Louis recently. The girl who wore it was of the drooping order. Lace depended from the brim of her floppy hat and her filmsy gown trailed after her for half a yard. The body of the coat, which was nothing more than a pleated frilli, missed her long and pointed waist by several inches. It was the sleeves, however, that gave the ridiculous effect. They were long and bell-shaped and completely covered the hands, suggesting nothing so much as a partly dissected giant spider. Hair that had doubtless been arranged low on the neet than this particular toilet was on the neet than this particular toilet was

made now hung in wisps about the girl's shoulders and made this admirer of the extremes of fashion a veritable sight to behold.

STYLISH SHOES FOR FALL. Flat Last Will Continue to Be the Smart Sole.

Smart Sole.

There is a tendency toward slightly more pointed shees, but otherwise little change in the models for this fail. The flat liss will continue to be the smart sole for all shoes, whether they are of patent leather, calf or tan, and should be of the extension kind and fairly thick.

The Colonial shoe is the very newest for summer wear and comes in both the high and low models and also in slippers. The low Colonial will be the most popular, as it has the Spanish heel and makes a very comfortable walking shoe.

The clipper of this style is very stylish and dainty with summer gowns and for evening wear. All of the Colonial shoes have the large gold or sliver buckle of different styles.

Patent leather continues to be the correct thing for dress and there is really nothing that can take its place.

The new street shoes are extremely conside, with medium soles and heels and a good broad last. A woman cannot display poorer taste than to wear high heels on the street.

BAKED TOMATOE RECIPE. Vegetables Filled With Eggs and

Cooked Twenty Minutes.

Tomatoes, because of the pleasant acidity, are suited to a great variety of combinations. An appeariant breakfast dish is prepared with eggs and the vegstables. Wash as many round, apple-shaped tomatoes as there are persons to be served. Cut a thin slice from the top of each for a cover and scoop out a sufficient space to admit the egg. Put in each a little butter, drop in the unbroken white and volk, salt and pepper, place a dot of butter on the top of the egg, replace the cover and bake for about twenty minutes, or until the tomato is tender. Grated cheese may be sprinkled over the egg before the cover is put on.

There is no end of delicious stuffings for tomatoes. They may be filled with rice sensoned with salt, pepper and butter, and a dash of curry or paprika if it is wanted, with a forcemeat made of chopped meat flavored with onion juice and parsky or with bread crumbs mixed with the tomato pulp and seasoned to taste. They will need to bake in a floderate oven about twenty minutes. Cooked Twenty Minutes.

HOW TO BREATHE CORRECTLY. Lost Energy Is Regained by Supplying Lungs With Oxygen.

No woman can have bright eyes, a beautiful skin or an elastic step if she does not supply her lungs with oxygen. She can do this by deep breathing.

The indolent woman regains her lost energy when she learns how to breath correctly. The sallow girl, with the dark circles under her eyes, discovers that with correct breathing the congested velos yield to the stimulated circulation, the dark rings disappear, and the luster reappears in the eyes. he eyes. Deep breathing will help to make curves

RUSSIAN SUIT.

where there are angles, and it is a potent factor in the cure of emaciation, because it supplies oxygen to the wasted tissues, and sets the machinery of the vital organs going, strengthening weak places and sup-plying red corpuscies to impoverished

USE FOR PAPER NAPKINS. Dainty and Artistic Table Covers Are

Now Made of Them.

A new use has been found for paper naplains. A very clever woman who is always thinking up novelties in the way of decorative features for her preity little home tried her skill on converting them Into a table cover, and the result was a revelation, for anything more dainty or arristic could scarcely be imagined. White rapkins with a border of pink roses touched with gold were selected. Four were sewel together for the cover, making the borders form a cross in the center. They were stitched on muslin to give sufficient strength. Sixteen napkins, folded twice, were required to go around the edge of the cover, and after being stitched on with the bordered side down were cut into narrow strips to form a fringe. Any one who has a taste for fashioning things will be more than repaid for the time and trouble in experimenting with this paper table cover, for so beautiful is the effect that no one would ever imagine, without a close inspection, that it had been constructed of paper. Now Made of Them.

TO PREVENT SUNBURNS.

Protection Afforded by Cold Cream When Applied to the Cheeks. When Applied to the Checks.

The great temptation after exposure to the heat and the probabilities of sunburn is to wash the face. Water acts like a mordant to set the dye of the sunburn. The complexion that possibly might have escaped with faint redness becomes scarlet and even blistered after washing. Wipe the face gently with cold cream or with ordinary sweet cream, and the effects of the sunburn will soon pass away.

Before going out in the heat apply a little cold cream to nose, checks, neck and hands. This will prevent tan and simburn and is an excellent prevention before taking a sea bath or swim or a row on the lake or a turn on the golf flaks.

SANDOW GIRL IS HERE.

Woman's Attire Makes Her Look Larger Than She Really Is. The Sandow girl is in style. The new shirt waists are built so that a woman looks twice as hig as she is. In her skirts she looks narrower, for skirts are very clinging and they are fitted as far down as the knews. But with the waist it is different. Here the figure must be broad and amarent y muscular, as that broad and apparently muscular, so that e midsummer woman, comes very near The new waists are made with the shoul-

# PRINCESS VIROQUA, M.D.

Practising Physician and Lecturer,

Sister of Oronyatekhar, Head of the Order of Forresters of the World,

Endorses Lydia E. Pinkham's Vegetable Compound After Following Its Record For Years.

From time to time we have been publishing in the newspapers of this country our statements and claims of the superiority of Lydia E. Pinkham's Vegetable Compound as a remedy for all the ills peculiar to women, but it seldom happens that the proprietor of a valuable medicine is able to produce such unquestionable expert testimony as we are permitted to publish in this article

It is unnecessary for us to devote much space by way of introduction of Dr. Viroqua, as both she and her family are of international fame. Her brother Orongatekhar, was second in rank of the Good Templars of the world when John B. Finch was chief. Now at the head of the Independent Order of Foresters of the world, having headquarters at Toronto, Can. Princess Virequa, the subject of our portrait, has been a practising physician and lecturer in the United States for the past twenty-five years; her standing in her profession and eloquence as a speaker is well known, especially throughout the West. She writes a letter to Mrs. Pinkham of interest to all women.

PRINCESS VIROQUA, M. D.

"DEAR MRS. PINKHAM: - Health is the greatest boon bestowed on humanity and therefore anything that can restore lost health is a blessing. I consider Lydia E. Pinkham's Vegetable Compound as a blessing to State and Nation. It cures her mothers and daughters and makes them well and strong.

"For fifteen years I have noted the effect of your Vegetable Compound in curing special diseases of women.

"I know of nothing superior for ovarian trouble, barrenness, and it has prevented hundreds of dangerous operations where physicians claimed it was the only chance to get well. Ulceration and inflammation of the womb has been cured in two or three weeks through its use, and as I find it purely an herbal remedy, I unhesitatingly give it my highest endorsement.—Fraternally yours, Dr. P. Viroqua, Lansing. Mich."

After a thorough consideration of such a testimonial as this we are perfeetly sure that the women of America will consider that we are amply justified in making our strong claims for the superiority of Lydia E. Pinkham's Vegetable Compound. Every one, of course, knows that Dr. Viroqua would not allow such a statement to be made over her signature unless it was absolutely true, and that her faith in the remedy must be great or she would not allow her portrait to be published in connection with her recommendation.

If you are ill do not hesitate to get a bottle of Lydia E. Pinkham's Vegetable Compound at once, and write to Mrs. Pinkham at Lynn, Mass. for special advice; it is entirely free.

S5000 REWARD. — We have deposited with the National City Bank of Lyan, \$2000 which will be paid to any person who can find that the above testimonial letter is not genuine, or was published before obtaining the writer's special per mission.

Lydia E. Pinkham Medicine Co., Lyan, Mass.

looks twice as broad as she did in the

looks twice as broad as she did in the spring.

Sleeves display the same peculiarity. They are tucked in rows of tucking running around the arm and they are trimmed with bands of lace going round and round all of which tend to make the sleeve large and the arm big.

Waists as a rule show the trimming put on, not from the neck to the belt, but around the figure and lace is used in a great variety of other ways, always running around.

There is one kind of lace trimming that is very nice and dressy upon the summer shirt waist, a nd which, fortunately, is of a sort that can be put on at home. It consists of a wide band of lace insertion sometimes six inches wide, and this is put around the waist directly under the arms, fastened at the back.

You will be what you will be; Let failure find its false content In that poor word "environment," But spirit scorns it, and is free.

It masters time, it conquers space, It cowes that boastful trickster Chance. And bids the tyrant Circumstance Uncrown and fill a servant's place.

The human Will, that force unseen, The offspring of a deathless Soul, Can hew the way to any goal, Though walls of granite intervens. The river, seeking for the sea,

Confronts the dam and precipice, Yet knows it cannot fail or miss; You will be what you will to be!

Sour Milk Is Used, but Sodn Is Put In

Before Flour Is Added.

In making muffins, as much depends or the way in which the ingredients are put together as on the recipe itself. A house keeper who is known for her fluffy break. fast muffins, which are niways as light as the proverbial feather, uses sour milk is making them, but decries the old-time way making them, but decries the old-time way of using it. According to traditional processes, the seda is mixed with the sour milk before the flour is added. This method, says the housewife in question, allows the effervescence to be over before the flour goes in. Her way is to mix with the sour milk the flour, sait and sugar and then to add the soda dissolved in a little hot water. By this means the entire mass rises. The last thing before the latter is turned into the pans, a heaten egg is folded in. This is her recipe: Two cupfuls of flour, one cupful of sour milk, a half teaspeonful of soda, one teaspoonful of sucar, a half teaspoonful of sait and one egg.

With all the multitude of heips recyided in these days for the young housewife, experience is still the best teacher, and without it a surety of success is impossible. In the matter of sour milk, for example—it is

right degree of sourness, but only one wise from familiarity with it knows when that point has been reached, and no one can give the amateur a hard and fast rule to follow. That the soda must be proportioned to the acidity of the milk is an infallible

BITS OF WISDOM. There can be no perfect love without per-fect sympathy.

Moralists seem to bear a special grudge to pretty faces. One is apt to love more the first time, but better the second time. It is the unusual man who is satisfied with his fortune and dissatisfied with his

A secret love defends the heart of a Woman is the salvation or destruction of the family.

A woman may give her soul for a man, and in nine cases out of ten he won't think as much of her as if she had jiited him for some one else.

When a man forgets his ideals he may hope for happiness, but not until then.
